

The Future of High Index 1.74

Finished Single Vision • Aspheric

1.74 AR
SuperClean
Advanced Hydrophobic Topcoat

High Index Double Hardcoat with Flexible Shock
Absorbing Primer and Extra-Thick Hardcoat

- New & Improved 1.74 Resin (with UV400)
- Patented MX Aspheric Design
- 10mm Spherical Fitting Button
- Outstanding Durability

The Leader in High Index

Seiko 1.74 AR Featuring New & Improved HR-74 Resin

Introducing Seiko 1.74 AR with SuperClean advanced hydrophobic coating. Made with a **new and improved HR-74 resin**, Seiko 1.74 AR lenses are more stable, less heat sensitive and easier to process than the two currently available 1.74 monomers.

Seiko 1.74 AR lenses use Seiko's patented and proven MX aspheric design technology, which corrects primary lens aberrations peripherally, and incorporates a spherical fitting button in the center of the lens that allows for instant patient accommodation.

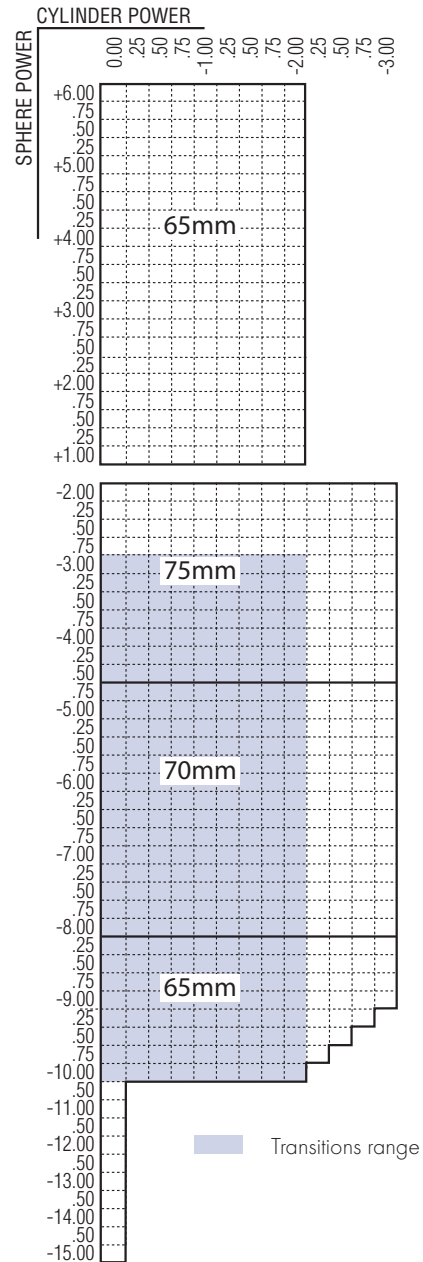

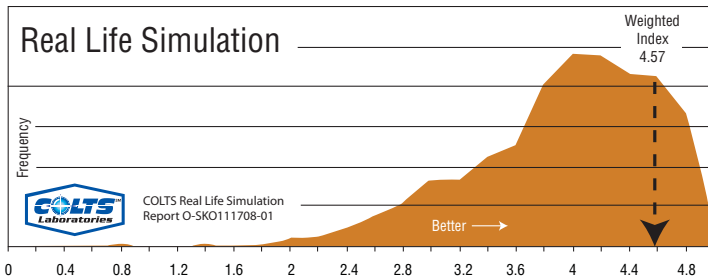

Seiko's high-impact, factory-coated SuperClean AR has an advanced super-hydrophobic topcoat that repels dust, dirt and grime and makes the lenses easier than ever to keep clean.

Specifications

- Micro-Engraving:** 
- Material:** New & improved (HR-74) 1.74 resin¹
- Softening Point:** Less heat sensitive¹
- Refractive Index:** 1.74
- UV Cutoff:** 400nm
- Density (g/cm³):** 1.47
- Safety:** Impact resistance exceeds FDA standards
- Drill Mounting:** Better suited for drill mounting than competitive 1.74 resins²
- ABBE Number:** 33
- Design:** Patented MX aspheric low-base design with 10mm spherical fitting button
- Center Thickness:** 1.1mm
- AR Coating:** SuperClean with super-hydrophobic topcoat, high-index shock absorbing primer and high-index non-tintable hardcoat
- Light Transmittance:** 99%

¹ More stable, less heat sensitive, and easier to process than competitive 1.74 resins.

² Outperforms CR-39™: 50% better in COLTS Drill Hole Strain Test
